5 TIPS FOR A CLOSE & COMFORTABLE SHAVE:

1. Wet the beard/hair with warm or hot water and apply shaving cream to soften. Apply a preshave oil before the shaving cream for an even more comfortable shave.
2. Use a sharp blade, as a lot of irritation is caused by using dull blades.
3. Shave with the grain; the same direction that the hair grows. For men, this is generally down on the face and up on the neck.
4. Shave a second time, this time going against the grain. Be sure to re-lather the area to avoid irritation—this is where a shaving brush comes in handy.
5. Apply an after-shave balm immediately after you dry your face. This will minimize irritation and add moisture and nutrients to your skin.
